Frontend Developer - Intern

Second year computer science student with strong foundation in front-end technology including JavaScript, React, HTML and CSS. Passionate about creating modern, interactive web applications.

Education

University of Economics and Humanities
Student of the Faculty of Computer Science
2023 - Present

Technical Skills

- **JavaScript, TypeScript**
- **React, Express.js, Resful APIs, RTK, RTK Query**
- **HTML5, CSS3, Sass, Scss**
- **GIT**
- **Effective communication, teamwork, adaptability**

Experience

University and open-source projects

- Implementing interactive UI elements in web applications using React and JavaScript.
- Creating responsive interfaces using CSS and styling tools.
- Using Git for code versioning and group project management.
- Testing web applications using tools like Jest to ensure their reliability.

Coding Course: React Developer
Certified Online Course
December 2023 - June 2024

- Learn the basics of React, including React Hooks..
- Create dynamic web applications using the latest web technologies.
- Implementation client-side navigation with React Router for seamless multi-page user experiences..

- Leverage TypeScript with React for safer coding practices and reduced runtime errors.
- Master form handling techniques, including solid validation patterns to improve user experiences.
- Deep dive into state management with Redux and Redux Toolkit to manage complex application states.
- Hands-on projects and exercises that simulate real-world app development scenarios.
- Working with tools like Context API, TailwindCSS, React Router, and Typescript.

Projects

Weather App
Individual project

- Creating a weather app using Next.js that displays current weather conditions based on a selected location.
- Using an API to retrieve weather data and integrating it with a front-end application.
- Implementing a search function that allows users to check the weather in different locations.
- Using React Hooks to manage component state and handle the component lifecycle.
- Styling the app using Sass, using modern techniques and frameworks.
- Working with GIT to manage code versions and collaborate with the team..

Other pet-projects are on github:
